**(h) Surface coating, reinforced plastic composites fabricating manufacturing processes, and graphic arts manufacturing processes shall be controlled by a dry particulate filter, waterwash, or an equivalent control device, subject to the following:**

**(1) The source shall operate the control device in accordance with manufacturer's specifications.**

**(2) If overspray is visibly detected at the exhaust or accumulates on the ground, the source shall inspect the control device and do either of the following no later than four (4) hours after the observation:**

(A) Repair the control device so that no overspray is visibly detectable at the exhaust or accumulates on the ground.

(B) Operate equipment so that no overspray is visibly detectable at the exhaust or accumulates on the ground.

If overspray is visibly detected, the source shall maintain a record of the action taken as a result of the inspection, any repairs of the control device, or change in operations, so that overspray is not visibly detectable at the exhaust or accumulates on the ground. These records must be maintained for five (5) years.

(3) A source is exempt from subdivision (2) if it operates according to a valid permit under:

(A) [326 IAC 2-7](#);

(B) [326 IAC 2-8](#); or

(C) [326 IAC 2-9](#).

(4) Surface coating manufacturing processes that use less than five (5) gallons of coating per day are exempt from the work practice standards in subdivisions (1) and (2). At any time the coating application rate increases to greater than five (5) gallons per day, a control device must be in place. A manufacturing process that is subject to this subsection shall remain subject to it even if there is a subsequent decrease in gallons of coating used.

~~(h)~~ (i) Based on modeling analyses available to the commissioner, where it is determined that the limitations in subsections (a) through (g) are not adequate to achieve and maintain the ambient particulate air quality standards established by [326 IAC 1-3](#), the limitations set forth in this section may be changed for facilities:

(1) having a significant impact on air quality and located in areas where the ambient particulate standard either is not attained or will not be maintained without emission limitations in addition to those set forth in this section; and

(2) required to comply with the prevention of significant deterioration requirements of [326 IAC 2](#).

These limitations shall be established in construction and operation permits issued in accordance with the procedures set forth in [326 IAC 2](#).

~~(i)~~ (j) If the emission limitations established in subsections (a) through (g) for facilities that were operating or under construction on August 7, 1980, impose a severe economic hardship on any individual source, then the source may petition the commissioner for reconsideration of the limitations. If the source can demonstrate to the commissioner's satisfaction that a severe hardship will be caused if the applicable requirements in this rule are enforced, then less restrictive emission limitations may be established by the commissioner, provided the less restrictive limitations will guarantee the attainment and maintenance of the particulate ambient air quality standards established by [326 IAC 1-3](#).

**Affected:** [IC 13-15](#); [IC 13-17](#)

Sec. 5. (a) For existing sources, the following shall apply:

(1) Whenever emission limitations set forth in [326 IAC 6.8-2](#), [326 IAC 6.8-4](#), [326 IAC 6.8-5](#), and [326 IAC 6.8-8](#) through [326 IAC 6.8-10](#) are revised and established under section ~~2(h)~~ and **2(i)** of this rule, the revisions shall be submitted to U.S. EPA for approval as part of Indiana's SIP.

(2) If a permit issued by the commissioner, under this article, contains emission limitations more stringent than the limitations set forth in [326 IAC 6.8-2](#), [326 IAC 6.8-4](#), [326 IAC 6.8-5](#), and [326 IAC 6.8-8](#) through [326 IAC 6.8-10](#), then the emission limitations set forth in the permit shall supersede and replace the corresponding limitations in [326 IAC 6.8-2](#), [326 IAC 6.8-4](#), [326 IAC 6.8-5](#), and [326 IAC 6.8-8](#) through [326 IAC 6.8-10](#).

(b) For new sources:

(1) emission limitations; and

(2) any revisions to emission limitations;

shall be established as conditions in permits.

(c) Upon issuance, the:

- (1) permits in subsection (b) shall be submitted to U.S. EPA for review; and
- (2) emission limitations contained in the permits shall be submitted as SIP revisions.

(d) In this article where there are two (2) emission limits listed for a particular source or facility, the source or facility shall be required to comply with both limits.
